

Northern Ireland Public Sector Shared Network

November 2018

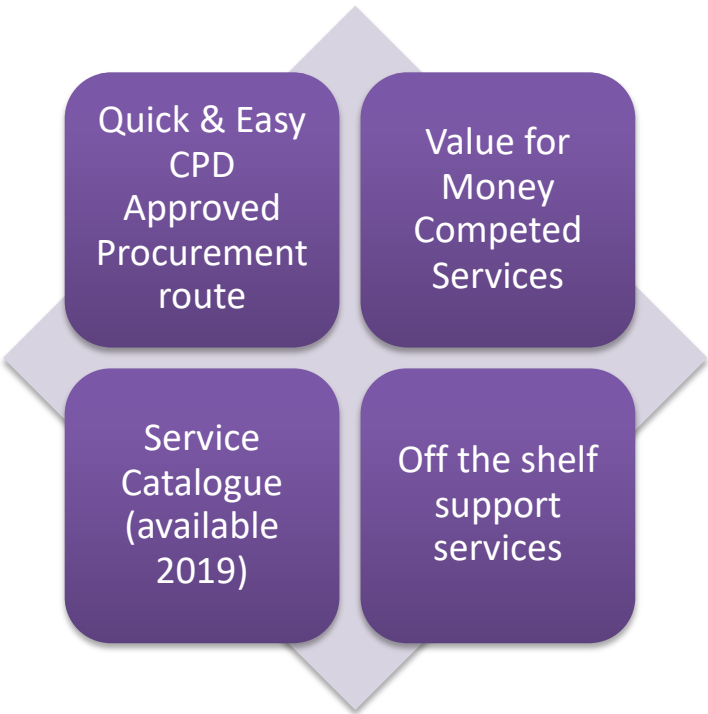

powered by 

1. How can the NI Public Sector Shared Network help me?

The Public Sector Shared Network is a government partnership with BT to provide data Network, infrastructure, equipment, managed and security services and related consultancy to **any organisation that is part of the Northern Ireland Public Sector**. The service has been assured by CPD offering a Pan-Public Sector approved procurement route.

Ranging from 1 circuit or switch right up to
a full end to end secure network and UC managed service

BT is committed to delivering a **FULL FIBRE** solution for all PSSN customers, where appropriate through this contract.

Phase 1 Transition of all existing users will be completed by 30th September 2019

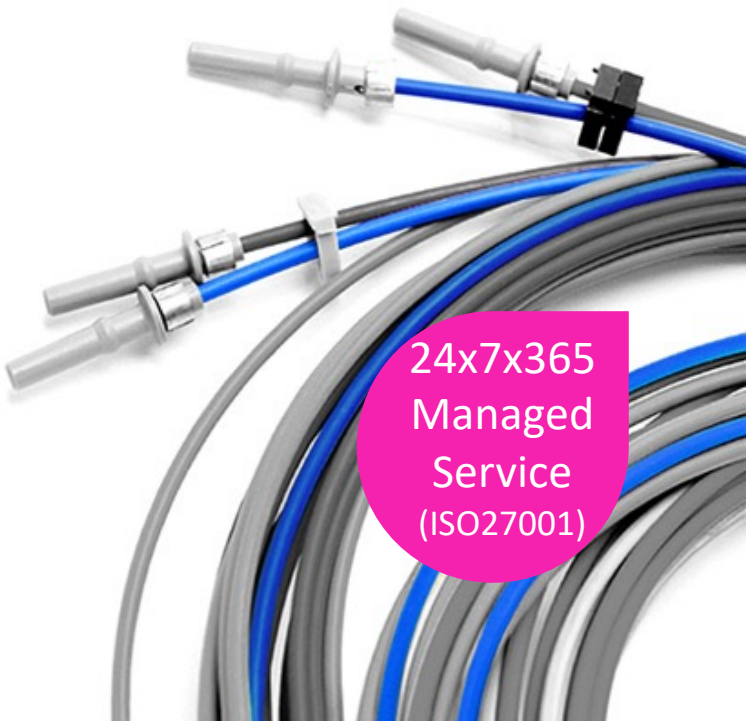

A full range of **professional and optional services** are available including network consultancy, security, business continuity, performance optimisation and more

VISION & STRATEGY

We can support your organisation through digital and technical strategy development to ensure that the connectivity of your people, places and services underpins operational and service transformation

INNOVATION

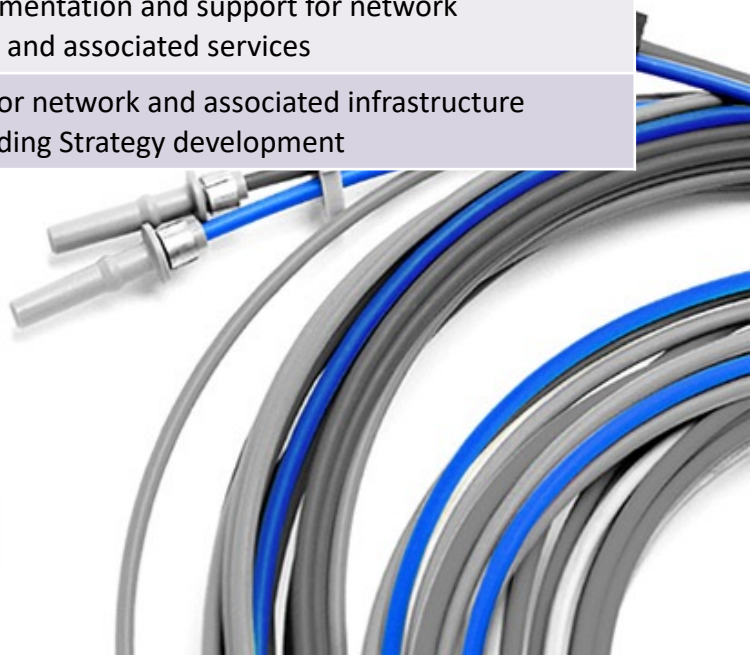

Provides the ability to explore new connected technologies and services including R&D, Proof of Concept type projects.

2. What can I buy?

Delivering all the connectivity, resilience and performance you need to support mission-critical operations through comprehensive service level agreements (SLAs), for the assurance of industry leading availability.
